Hooligans

Issues

Catch me running around the town if you can
My heart on my sleeve and the world in my hands where do we go Where do we stand
You dream but you never move so don't be mad when I do

Patiently waiting to give up everything I got
Start thinking about my future at the number one spot
My friends think they lost me but I'm still the same me

Hooligans got big hearts but they're just some kids
Cali made flashy sins need nobody cause we know where we fit in

I'm so close to the edge of the life that
I sacrificed and starved for but you've buried everything
We used to fight for set it off

Patiently waiting to give up everything
I got start thinking about my future
At the number one spot my friends think they lost me
But I would never change and I would sell out my pride
When everybody wanna say you never gave a damn
About your boys in the first place old Dena raised me
And the road will never change me

To everyone who stuck around this one's for you
They may say we're a lost cause but they don't see what I do
