

# Gonna Be Good

Matt Wertz

[?] or think about what  
You're gonna do about it  
Nothing's gonna change on its own  
[?]  
Maybe that's life trying to tell you something  
But it won't take too long  
You would see it's not long  
I wanna see you what you're made of  
Get up and fight you know you should  
Try there's nothing you should be afraid of  
I'd take your place if I could  
To stay safer it's gonna be good  
I think about this  
What if all your plans just feel right in the place  
Would you be better then?  
Was it the brokenness that builds you  
The emptiness that fills you  
Or the times you could get away  
Let that trouble have its way  
I wanna see you what you're made of  
Get up and fight you know you should  
Try there's nothing you should be afraid of  
I'd take your place if I could  
To stay safer it's gonna be good  
It's gotta get worse before it gets better  
I know it ain't easy nor need it should  
Know how to wait and what you have to do  
Come into the city, buildings are falling  
Listen to the crowd, angels calling out to you  
To bring you through, to bring you through  
To bring you through  
I wanna see you what you're made of  
Get up and fight you know you should  
Try there's nothing you should be afraid of  
I'd take your place if I could  
To stay safer it's gonna be good  
I wanna see you what you're made of  
Get up and fight you know you should, oh should  
Try there's nothing you should be afraid of

I'd take your place if I could  
To stay safer it's gonna be good  
To stay safer it's gonna be good  
To stay safer it's gonna be good  
(I wanna see you what you're made of)  
(I wanna see you what you're made of)
