Make It Happen

John Waite

I've been watching you now, I've been caught in these hours
Days are turnin' to nights, I live where there's no, no room for strangers
When I see you again, will you still feel the same way?
I understand that in your eyes, I can't do nothing rightAll day, all night, make it happen, make me feel alright
All day, all night, make it happen, make me feel alrightOh, yeahWhen I see you walk by, turn my head, wanna break down
I've been livin' alone, I've been livin' a lie, I get so scared of my fears
There's this place in my life, for just one time or maybe forever
I understand it's in your eyes, I can't get nothing rightAll day, all night, make it happen, make me feel alright
All day, all night, make it happen, make me feel alrightI've been watching you now, and I've been livin' in a daydream
It's that I miss you so, can't think of words, I break down, I've been lonely
When I see you again, will you still feel the same way?
I understand that in your eyes, I can't do nothing rightAll day, all night, make it happen, make me feel alright
All day, all night, make it happen, make me feel alright
All day, all night, make it happen, make me feel alright
All day, all night, make it happen, make me feel alrightAll day, make it happen, alright, make it happen, yeah
Make it happen, yeah yeah
