Say Something

The Watchmen

In crept the sunshine gently touched my face
Kinda woke me with its grace
Roll myself over pray that you're there
My first day here without you there

Everything's so quiet
You just closed your eyes
Left me here behind on my own
Say something my dear
Say something dear

Float my way downstairs hoping it's a dream
But I don't wake up when I scream
Just how many mornings did I wake with you
I need some more to see me through

Everything's so strange now
You just closed your eyes
Left me here behind on my own
Say something my dear
Say something dear
Say something my dear
Say something dear

And all the wise ones say move on
We lose no sleep for those who've gone
We have no fear of letting go
But I'll never let go never let go

It's four a.m. now I can't close my eyes
Too scared to lie here without the lights
The second night without you's no better than the first
I pray the third one won't be worse

Want you to say something my dear
Say something dear
Say something my dear
Say something dear

Say something my dear

Say something dear
Say something my dear
Say something dear
