

Boomerang (feat. Joey Stamper)

[Rachel Potter](#)

I can still see us walking down the boardwalk
Holding hands, making plans
But we were young and hadn't seen much
Though there was so much love between us
Had to go our separate ways to understand
We threw our love away, but it came back like a boomerang
Every wrong turn led you right back to me
I've seen the lights in the Northern sky but they can't compare to the
light that's in your eyes
The New York chill in the winter time ain't nothing like the chill that you send up my spine
Every time you say my name, puts the sounds of the Gulf Shore waves to shame
I went all around the world and I came back like a boomerang
I came back like a boomerang...like a boomerang
You know they say 'if it's meant to be it will be'
Just gotta let it go, you never know
Maybe we were right for all our fears or we were wise beyond our years but baby, I...
I've just been looking for you ever since
We threw our love away, but it came back like a boomerang
Every right turn led you straight back to me
I've seen the lights in the Northern sky but they can't compare to the
light that's in your eyes
The New York chill in the winter time ain't nothing like the chill that you send up my spine
Every time you say my name, puts the sounds of the Gulf Shore waves to shame
I went all around the world and I came back like a boomerang
You said that we were too young to know what's
right, we just need a little more time
We're only kids, we were only kids
Gotta go out and live our lives, follow our own star, find out who we are
And then we did, and then we did
Went all around the world and found my way back to you
I've seen the lights in the Northern sky but they can't
compare to the light that's in your eyes
The New York chill in the winter time ain't nothing like the chill that you send up my spine
Every time you say my name, puts the sound of the Gulf Shore waves to shame
I went all around the world and I came back like a boomerang...
I came back like a boomerang...like a boomerang
