The City

Wu-Tang Clan

That's black? What up God?
Aiyyo, Shorty got beef with that nigga? Word?
Oh shit, yo, hold the fuck upAiyyo yo, eight niggaz down
(Just enough)

Fuckin' around with my sound

(City)

Yo, bring backup

(City)

Fuckin' with me and mine murderous Check it, yo, the world is shifty, we livin' just enough for the city

The rough witty killa bee sting just like the jiggy

My Family Stone, foes attempt to gradually clone

Label them my anus and the casualty's homeIt glows coffin, Wu stormin' like the light brigade

Ride the wave like Frankie Avalon as I decipher AIDS crime pays

The law's long arm be tryin' to strong arm, walkin' time bombs

Before I bomb firearm the calm smoker, I hit the dread with a posterHe toke with his own love and expose the black toaster

Composer was shook, I took your bad looks for joke

Get your back broke deep throat this murder I wrote

The antidote be seekin' like a buried treasureBy every measure lethally inject your whole sector

Wanted dead or alive rebel I escapes across the desert sand

Leavin' no footprints to trace keep a war face, in your place

Conceal the baby knives on the North breaks

I still shine in shady times Yeah, yo we livin' just enough

(Livin' just enough)

Just enough, just enough, for the city

(In the city)Yo, in the jungle, I make moves like Iron Monkey

Plots to bump me off D.O.T. be on the hunt for me

We stay hungry, for money drugs and guns

Ones who fake get caught in the crossfire for crumbsKnow the science be my Goddess

The facts tell gats sell like sex and violence

And break the project silence, a vision

This is way beyond four corners, escape this mental prisonBefore we're all goners, now embrace the world

For the world war is ocean bomber visionary soldier comma

My code of honor, mind still start from the drama

Trauma sent the victim, witness them run, scream in horrorMilitary chopper come gun down the slum

The outcome do or die son it's bound to come

Mentally aware I see truth within the square

The future's here catch me on computer softwareWarfare's inevitable, rebel I hold several government official It's a thirty-eight special, that steps through

Like Nat Turner create a spectacle I may die in the scuffle but I'm takin' forty devilsWe livin' just enough Just enough, just enough For the cityKilla beez, sting Mcez, yeah, Wu
