

# Don't Give Up

## Dub Fx

So let me escape the Babylon and let me live in a forest /  
Me run away from addiction into the peacefulness /  
Me breathing in the energy to love and manifest /  
Me storing the adrenalin and put it in me chest /  
Me meet a peaceful man he tell me that he must suggest /  
To live a life of honesty and modesty and rest /  
Him speak to me of energy a pure stabilist /  
I believe in evolution I'm an interracialist /  
Don't give up, we're gonna make it in the end /  
Don't give up, tell your neighbour tell your friend /  
So cruising through the east from Berlin to Bucharest /  
Then all the way to Riga and back down to Budapest /  
Me run away from all the games and bureaucratic stress /  
The road be getting longer but me never stop to rest OH /  
And some of the men me meet is in a no win mess /  
Slaving up to Babylon in diamond dress /  
But judging is so negative and meaningless /  
I try to be peaceful everyday nothing more nothing less /  
Don't give up, where gonna make it in the end /  
Don't give up, tell your neighbour tell your friend /  
So take the collective minds and breed a pure consciousness /  
Break the selective lies and media abusiveness /  
The waves are now approaching can ya feel the iciness /  
The world is gonna change an age into Aquarius /  
We're moving at a faster rate then super sonic-ness /  
The paradigm is shifting in collective higher-ness /  
So make a move and don't get used to babyloniness /  
Where all in sufferation in this tiny universe /  
Don't give up, where gonna make it in the end /  
Don't give up, tell your neighbour tell your friend
