

# On a Long Night

## Nowherebound

On A Long Night

Can you hear my heart beating?  
It's playing out this tune just for you.  
And are you lonely little girl?  
Cause I've been lonely too.

And the long hard days, they just strip away,  
All that we are  
And the games life plays, they just strip away,  
All that you own

So put a candle in your window darlin'  
And pull those shutters down so tight.  
I can see the storm clouds rolling in.  
And I know it's gonna be  
It's gonna be a long, long night

And it's alright, on a long night  
When you feel you can't go on  
Oh baby, hold tight, for the daylight  
We'll just let love lead us home.

Save a dance for me, my darling  
They're playing out this tune just for you.  
So don't be lonely little girl  
Cause this beating heart beats for you.

And that long walk home, won't be walked alone,  
But hand in hand and step by step  
And life's little house of cards, we can build upon two hearts  
Arm in arm and evermore
