

Love In High Places

[Kimbra](#)

I will be your savior
When no one'll save ya
Be your shining light
Galvanize
Make you burn all up inside But there's a space that I'm saving
To keep me strong
There is a place that I'm saving
We can't stay for long I will be your lotus
Go slow so you don't notice
Out of the dead wood, the disease
Closer and you'll find me There's a space that I'm saving
Gotta keep it strong
There is a place that I'm craving
We can't stay for long Find me in the forest in the fire
Find me in the midst of your desire
I got love in high places
Love in high places
Find me in the secrets, in the lies
Find me in the darkest place in here
I got love in high places
I see you loving in high places I will be your danger
Me think nothing can change ya
It's pyrotechnical, physical
Way I rock your maker There's a space that I'm saving
To keep me strong
There is a path that I'm paving
'Cause we can't stay for long Find me in the forest in the fire
Find me in the midst of your desire
I got love in high places
Love in high places
Find me the secrets, in the pain
Find me in the dry earth, in the rain
I got love in high places
I see your love in all places Love will surely break your heart
Then set you free
