

How Lucky We Are

Douwe Bob

We got the upper hand
A random set of cards
Try and see my friend
How lucky we are
You got your big eyes fixed
On the rearview mirror
I say we look ahead
To see how lucky we are
And it's a strange life
It's a great ride
There's a light you don't see
You're the light that shines on me
We got everything we need
To make this work
We live a long, long time
And feel life is short
We got all we need
And yet we still want more
We got the upper hand
A random set of people
Such very close friends
How lucky we are
And it's a strange life
It's a great ride
There's a light that you don't see
You're the light that shines on me
We got everything we need
To make this work
Oh, we got all we need
There's a light that you don't see
You're the light that shines on me
We got everything we need
To make this work
There's a light that you don't see
You're the light that shines on me
We got everything we need
To make this work
