Flinch

Citizen Fish

It's a fine line with drops on either side/instant reactions : being undecided /would lose a balance unrecognised/don't leave me alone! don't rouch me!/could just as love those he despised/or vice-versa - a social supply/of any extreme you could need to arrive/of points unchartred part through fear/part through reliance on getting this near/having regular good times usually late/passing through the uncertain state/through the flinch reactive zone/where no-one stands completly alone/where togetherness tenses/just like talking over fences /ignoring the barrier but keeping it there/in case the candle starts to flare/ too brightly for the eye to see/so much at once - okay hold it there
