

T for Trouble

[rumHoney](#)

T For Trouble

She said her name began with T
She kept me guessing
Don't know what she saw in me,
She was only messing
She leaned up against a wall
I was looking right at her
Call me anything at all,
I doesn't matter

That's when I knew, that it had to be true
She was T for Trouble

That's how it all began
With my T For Trouble
I just shook my head and ran
The run-away shuffle
She was the very first to see
Every low-down side
She brought out the worst in me
Every time she tried

and that's how i Knew, there was nothing i could do
She was T For Trouble
