Come On

HEADSTONES

Come onI see you smiling, youre smiling for the camera
Youre trying to catch a moment of truth in propaganda
Well, all the doors are open and you know whats important
Youre here to live your life or are you here to front for shorty?Come on, I know that youre waiting, come on
So check the price youre paying, come on
You cant afford the minutes, you know the time is moving
You know the clock is tickingRight now, its the only moment that counts is
Right now, is the only time Ive no doubt
Is right nowI know the struggle that happiness is haunted
You dont get what you need and you dont get what you want
Now everything is ringing, reality is calling
If youre digging Gary Busey, youre living Buddy HollyCome on, lean into the curve and come on
You know the nerves are perfect, come on
Look down from above it, just see just where were at
And to know how far weve come
