

Stand Too Close

Motion City Soundtrack

If I stand too close I might fall in
But if I'm too far gone I'll never win
If you believe in me
I might just wanna spend some time with you again
I'm afraid I tend to disappear
Into an anxious state when you draw near
There is no reasoning, it's quite a silly thing
But it's the way I've been for years
So I will understand if you don't stay
They say I'm great at first but then the magic fades
Into an awful hue of dismal views and pessimistic attitudes
All this distance, years of sweet resistance
Swirling overhead like angry clouds of of contempt
I have apologized a billion times
When I've gone off the wall like Buster Rhymes
And pulled a stupid stunt that left you thinking
There was something wrong with me
You've thrown a few choice phrases at my way
And I've ignored them all as best I could
Except that time you put how I just can't commit
There was some truth in what you say
All this distance, years of sweet resistance
Swirling overhead like angry clouds of of contempt
If I stand too close I might fall in
But if I'm too far gone I'll never win
And if you believe in me
I might just wanna spend some time with you again
I'll spend time with you again
If I stand too close I might fall in
But if I'm too far gone I'll never win
If you believe in me
I might just wanna spend some time with you again
