

# Don't Take It Too Hard

Tuomo

Young girl, I know you're sad 'cause it didn't work out for you  
The way you expected and now you've got to start anew  
I know what you're thinking, you know I've been lonely too  
I can offer these words of consolation  
When you think you can't make it through There's a future for you I promise  
It's not the end of your world  
'Cause we've all got our problems  
We can get by, oh yes we can  
Young man, you're down and out, your rent is overdue  
You've got no money, You've got no job, boy, you haven't got a clue  
Don't give up on your dreams 'cause it all depends on you  
If you keep working night and day you know they will come true, yeah Just look over your shoulder brother  
You know I will be there  
'Cause we've all got our problems We can get by, yes we can, if we try  
We can get by, oh yeah if we work together  
Come on now Young man you know you're not alone  
Young girl you know you've got your home  
Young people around the world  
Get together, every boy and girl  
And share your sweet consolation when you think you can't make it through  
Happiness is around the corner  
And joy lives down the street, hey  
There's a world out there waiting for your call  
So what are you waiting for?  
What are you waiting for?  
'Cause we've all got our problems  
We can get by, yes we can  
Let me show you how, come on!
