

# Together We Are One

## Delta Goodrem

Here we are sharing our lives  
We made it through the good and bad times  
And still we stand with hope in our hearts  
No matter what we will play our part And now we've come so far  
One chance to touch a star  
Go higher and higher Find your guiding inspiration  
In a place where dreams are made  
With a lifetime's preparation  
It's no time to be afraid Put our differences behind us  
While we shine like the sun  
See what we've all become  
Together we are one Deep inside your heart and soul  
You've worked so hard to reach your goal  
With every step with every breath  
You gave it all till there was nothing left Seek out the strength to win  
No thoughts of giving in  
Go higher and higher Find your guiding inspiration  
In a place where dreams are made  
With a lifetime's preparation  
It's no time to be afraid Put our differences behind us  
While we shine like the sun  
See what we've all become  
Together we are one Find your guiding inspiration  
In a place where dreams are made  
With a lifetime's preparation  
It's no time to be afraid Put our differences behind us  
While we shine like the sun  
See what we've all become  
Together we are one See what we've all become  
Together we are one
