

# Not So Far Away (Faith, Hope and Love)

## Misty Freeman

### Faith, Hope And Love

I think you might remember me...you used to know me well....  
before you were introduced to fear...and doubt  
I was with you on that cold dark day....when you were all alone..  
and you thought that things would never turn around..  
It was me that moved that mountain...that was...standing in your way...  
I believe you want me back so I will stay....My name is faith....my name is faith...

I noticed you been looking at that star up in the sky...you're searching for a light to guide you home..  
you think you need a reason just.. to trust a simple prayer....I am here.. when you think I might be gone..  
I am the companion of that.. happiness you'll find...and I promise I am ever close....  
My name is hope...my name is hope...

((CHORUS)) we are the voices ...that still whisper in your heart...  
and if you'll listen carefully ...you'll know just where we are....  
carrying the promises..that heavens not.....so far....away..

I'm the one who speaks the loudest...I'm the keeper of them all...  
I was born before the world was ever here...I... am everywhere and everything...you'll ever need to know...I'm  
the passion in your laughter.. and tears....  
I'm the healer of the broken....the forgiver of your soul....and I'm ready to descend just like a dove...  
My name is love...my name is love....

Repeat Chorus  
my name is faith...my name hope....

My name is Looooove.....
