

Your Side

You Blew It!

Free drinks and unfamiliar faces
You've never been a fan of these places
I'm overdosing on caffeine
And you can't hear me But I'm by your side A chemically induced amnesia
I know you remember
But I'm by your side tonight
No matter how many times you're convinced otherwise As long as you consider this place home
Know that I'm by your side tonight
No matter how many times you're convinced otherwise If you don't come out of this
Know you won't go alone
If you don't come out of this
Know you won't go alone Because I'm by your side tonight
No matter how many times you're convinced otherwise
I'm by your side for all time
No matter how many times you're convinced otherwise
