All Over Again

Phantom Planet

Your crash is waiting to happen
And you, you're dragging me down
All over again
I give in, I give upYou splashed but you started sinking
And you, you're dragging me down
All over again
I give up, I give in, I give upYou are crowding me and I want to get out
This is the end all over again
You're crowding me and I just want to get out
This is the end all over againI give up
You are crowding me and I just want to get out
This is the end all over again
You are crowding me and I just want to get out
This is the end all over again
