

Total Bummer

Silverstein

Go away, sunny day All the horny people sitting in front of their TV and thinking
What is wrong with me, Im not a monster
Why wont anybody fuck me, I dont wanna live life lonely
Why does everyone have to be perfect Go away, sunny day All the bar flies sipping whiskey, fighting ever
present pity
Wondering what they are sucking back for
Is it the drink or trepidation? Watching all trains leave the station
Left standing alone without a ticket You light up my life
You give me hope to carry on
You light up my days
And you light up my life Go away, sunny day Stop searching 'cause theres no answer just a long line of disaster
Theres no simple way to stop the sadness
Lifes not fair, Im glad its not, this isnt heaven just a lonely planet
On the verge of self destruction
