

Can't Make This Over

Pixie Lott

I only miss you when you call
So please don't pick up the phone again
In the confusion of it all
Give me time while my mind's unravelling
I just can't escape this feeling
But it's taking over me, all over me
I know now I can't try to hide it
It's clear to me that I can't fight it
You wanna take it back to where it was
But I can't make this over, I can't make this over
You want another chance to try again
But I can't make this over, I can't make this over
Now don't say I don't miss the way we were
I thought nothing could tear us apart
Why do you have to sabotage our love
And leave me with a broken heart?
You think that I won't forgive you
It's far beyond a breakup, kiss and make up
I know now that it's not about you
I know that I can't live without you
You wanna take it back to where it was
But I can't make this over, I can't make this over
You want another chance to try again
But I can't make this over, I can't make this over
And now I'll follow my heart
And now you're out of my life and now
You wanna take it back to where it was
But I can't make this over, I can't make this over
You want another chance to try again
But I can't make this over, I can't make this over
I can't make this over now
