

# Central AC

## We Are Scientists

I know that if I let it  
It's gonna happen every single night  
I'd really love to tell you  
It's only getting better all the time But every now and then  
When I come to and I know my friends  
Won't even know where I've been How the night was spent  
And the fact is I won't know myself  
Until I do it again Hey  
Let's take it easy for a night  
Try  
To keep it relatively light 'Cause otherwise  
Tomorrow I may not remember this  
Tonight  
I really hoped it wouldn't end like this  
But I should have guessed it 'Cause every now and then  
When I come to and I know my friends  
Won't even know where I've been How the night was spent  
And the fact is I won't know myself  
Until I do it again I know that if I let it  
It's gonna happen every single night  
I'd really love to tell you  
It's only getting better all the time I know that if I let it  
It's gonna happen every single night  
I don't know what to tell you  
It's sure not getting better 'Cause every now and then  
When I come to and I know my friends  
Won't even know where I've been How the night was spent  
And the fact is I won't know myself  
Until I do it again
