

Long Time Gone

Triumph

You say you're not afraid
Behind your walls of pride
They keep the world away
But some thing's trapped inside I'll go any way
The wind blows
And you know
The storm comes and the river will run You better hold on to the moment
'Cause it may never come again Long time gone
Where do we go from here
Long time gone away The voice of reason begs
The fighting takes its toll
You're bangin' big square pegs
Into little round holes But I'll go
Anyplace your heart goes
And you know
The music plays and the heart obeys You gotta keep this thing together
But you don't know the why or how
It's getting hard to find forever
In the state of here and now Long time gone
Where do we go from here
Long time gone, gone Time gone away
It's been a long, long time gone Long time gone
Where do we go from here
Long time gone, gone
