Under the Volcano

The Bears

hold me closer - keep your distance
tell me your secrets - mind your own business - sally
we had everything - under the volcano
we watched our laughing children sing - under the volcano
you thought that i was beautiful - under the volcano
a hundred thousand years ago - under the volcano
hell is here on earth, you know - under the volcano
when you top the bill at a freak show - under the volcano
where the flesh is weak and the minds are slow - under the volcano
a waterbed on a lava flow - under the volcano
