In Axestasy

Cattle Decapitation

Behold, the blade is nice and dull from the millions of heads
From the millions that we left for dead
Bluntly disassembled, painfully dissected
With an instrument of gore
Bisected heads like rose petals litter the floorClinically insane, serotonin flooding the brain
A sudden charge of epinephrine leaves my victims writhing in pain
In ecstasy I continue to maim
No one around me shall remain the same
I can take off their scalp, watch the cranium palpitate
Bleeding and throw them awayI decide your fate
I say you're too late
Judgment stick of hate
I decapitateWith this axe I behead
With this knowledge
I've obtained of the human race
I leave you deadI've stared in the eyes of my helpless casualties
I've yet to experience any kind of human remorse
I stand on the harvest floor
The place where death shows its face
And extinguishes all of the human raceBehold, a blade to crush the skull, the ribcage
Break every bone and destroy every membrane
Smite the people with vengeance
Bring damnation upon their descendent'sBluntly disassembled and painfully dissected
With an assemblage of gore, bisected heads
Appendages, intestines and moreClinically deranged, norepinephrine driving me insane
A sudden charge of adrenaline leaves my victims writhing in pain
In ecstasy I continue to maim everyone now just a pawn in my game
I can remove their faces now displaced in ways
That you never thought could happen againLike the murders of yore
Dearly departed and discarded gore
Forever living in my mind
In axetasy, the only peace I can findI decide your fate
I say you're too late
Judgment stick of hate
I decapitateWith this axe I behead
With this knowledge
I've obtained of the human race
I leave you deadI've stared in the eyes of my helpless casualties
I've yet to experience any kind of human remorse

I stand on the harvest floor
The place where death shows its face
And extinguishes all of the human raceIn axetasy its fight or flight
Euphoria in slice and dice
No better way to spend my nights
In axetasy I end your life
