

# Shake My Soul

**Beth Nielsen Chapman**

I had it all lined up  
And then my future crashed  
I heard the deadbolt lock  
And there stood my past But there are no signs for tomorrow  
On the back roads of my sorrow  
I could beg, steal, I could borrow  
But the grace will have to come to me I'm gonna shake my soul and release my hold  
Givin' up control and let the rest unfold  
'Cause it's a long, long way from here to where we go Take off the training wheels  
Lift off the handle bars  
I'll drive right through my fears  
And resurrect my heart And even in my darkest hour  
When my tears stay undercover  
I know it one way or another  
Love is coming back around to me I'm gonna shake my soul and release my hold  
Givin' up control and let the rest unfold  
'Cause it's a long, long way from here to where we go In the face that I wore as a child  
I can see myself  
Every day of my life I'm trying just to free myself  
To be myself And the rain comes I can hear it  
Like a bass drum loud and clear it's  
Ancient wisdom of the spirit  
Ali, Ali in come free I'm gonna shake my soul and release my hold  
Givin' up control and let the rest unfold  
And when the fold wins both and the rivers flow  
We gonna rockin' more, 'cause when it all gets stored  
It's a long, long way from here to where we go It's a long, long way from here to where we go  
Oh, no, it's a long, long way from here to where we go  
It's a long, long way from here to where we go  
It's a long, long way from here to where we go  
It's a long, long way from here to where we go
