

You Should Know Me

Joe

Ladies and gentleman
I'd like to take y'all back
Back to the future
When we used to slow jam at the parties
So, fellas grab your lady, and take her to the dance floor
You already know

I remember when we had so much trust
And nobody couldn't become between us
Do you remember?
Now you listening to he said/she said
And they keep puttin' thoughts in your head all the time

Girl, your heart is filled with so much doubt
'Cause you think that I've been playing you out

Girl

[Chorus:]
You should know me (You should know me)
Know me by now (By now)
I would die before I hurt you
You should know me (You should know me)
Know me
And I will never let you down, oh

You believe that I've been getting down
With your friend when you're not around
Now, why would I do it, baby, baby?
I don't deny that there is some attraction
But they lie about my reactions
I could never, never hurt you, baby
Never, never, never

Girl, your heart is filled with so much doubt
'Cause you think that I've been fooling around

[Chorus]

If you could look inside of me

Before you start your third degree
You would know exactly how I feel
No one else can take your place
I love you more, more and more each day
Don't you let them take away this love that we have, baby
No, baby, no

[Chorus x2]

Why would I give you my credit card
If I really didn't love you, baby?
Why would I buy you a diamond ring
If I really didn't love you, baby?
If you wanna know
If you really, really, really, really want to know
Don't ask my neighbors
'Cause, baby, they don't know what they saying (You should know me)
All you gotta do is ask me, girl (Know me)
And I'll let you know (You should know me)
I will let you know (Know me)
Yes, I will
