

Levitation

Photek

In the darkness I will shine
Cast no shadows or define
Walk on water, float on air
There is no other to compare I have this fascination, no cause for deviation
It's called levitation, levitation, levitation There's no cause to start and scream
Nor rub your eyes, this is no dream
Although I sit upon this chair
I rise and float up in the air I have this fascination, no cause for deviation
It's called levitation, levitation, levitation Magnetic force, repel, attract
Once it starts, there's no turning back
I offer you this chance to learn
Take it now, there's no return I have this fascination, no cause for deviation
It's called levitation, levitation, levitation Magnetic force, repel, attract
Once it starts, there's no turning back
I offer you a chance to learn
Take it now, there's no return I have this fascination, no cause for deviation
It's called levitation, levitation, levitation
