

# Best Friends

## Down By Law

Wake up in time to get you call  
Make sure this time we got it all My best friend's always near me, cheers me, looking after me  
I need her and it's clear to see  
My best friend's always near me  
(Enjoy this as long as we should be)  
With only her my life it could be My friend knows why when I've lost track  
We'll never cry, we'll always laugh  
For a stop and go and I know we would  
My friend's always by my side And it's so nice to be near her  
(Or just to come to hear her) These days are looking ofently good  
We made it and I know we would My best friend's always near me, cheers me, looking after me  
I need her and it's clear to see  
My best friend's always near me  
(Enjoy this as long as we should be)  
With only her my life it could be Hold on to me, hold on to me
