

Jewel In Our Hearts

[Nick Carter](#)

Sometimes you try so hard to be things that you're not
You're hiding behind a wall that you can't see
Just one push and the wall will come tumbling down
And then you're left naked standing all alone
Always coming to an end before we can start
Sometimes you feel that you have no control
We'll run for cover, under this roof we will be warm
Right by your side together we'll wait out the storm
Don't you know a change will come
Just stand firm for all you believe
Don't you know that we will be where we want to be
Just come with me you're not alone
A star shining brightly, a diamond a ruby
A treasure to find, brings a smile to my face
Shake off all your troubles, they roll right off your back
Just like an old stray dog when he's caught in the rain
And I know that some day we'll find what we
