

On a Bang

Biffy Clyro

[Verse 1]

Oceans of red, oceans of darkest red
I can predict the future, I will predict the future
What you don't know is none of your concern
You only fuck computers[Pre-Chorus 1]
Blame the science, just don't blame mother nature
She rides the lightning, we're only ones and zeroes

[Chorus]

Now you know better, why can't you fucking do better?
Now you know better, why can't you fucking do better?[Verse 2]
I gave my heart over to rock'n'roll, what is your contribution?
Where is it in your soul?
Time doesn't heal, you just learn to deal with it
Well there's your shitty future, you motherfucker[Pre-Chorus 2]
6 is silence, just don't blame mother nature
She's kinda frightening, we're only ones and zeroes
