

# The Future Is Now (feat. Big Rube)

## Future

Advisory - the following lyrics contain explicit language:

So far away from what is natural.  
Makes me sad and makes us sick, where are we?  
And what the hell are we going to?  
Human gets a robot, brains without feelings and i hate it.  
Please do not fall out and see the sense to stay in.  
To stop the robots and feel love and live it.
