Meant To Be

Squirrel Nut Zippers

All the time I'm finding ways to make things fall in line
I know how tricky things can be
But I really do believe that you are mine
And all the stars are there before us
Listen here some things are meant to beTried to take it slow, tried to lose control
But I'll tell you what the trick is
What you get is what you had to give away
When I learned I found my eyes were openedLong ago I had a dream that quickly faded
Goes to show how tricky dreams can be
But wouldn't you agree that those who know
Will whisper when they see us walking
"There's a love that's always meant to be"
