My House on Mars

Ayreon

"It is the end of the 21st Century. I have returned to my own childhood. I remember it all as the Dream Sequencer images mix with my own recollections. This is the day my sister and I realised that we would never see the planet Earth."[Johan Edlund, Floor Jansen]Daddy where are you now
Forgot about your vow?
You promised you'd return and take me to EarthDid you have to fight that war
What was it all for?
The honor of one's name, what is it worth?I'm all alone - we're all alone
My future's unknown - our future's unknown
I reach out to the stars out here in my house on MarsMother did you hear me cry?
You never told me why
You put me in this world of rock and dustNo friends for playing games
No foes who scorn my name
Computerized machines of steel and rustIs this my home? - this is our home
This desolate dome - this desolate dome
I call out to the stars: I'm alone in my house on MarsI'll never smell the ocean breeze
I'll never climb the highest trees
I'll never feel the burning sun
I'll never meet my chosen one... in my houseDaddy I forgive you now
You could not keep your vow
You will never return, I'll never see EarthMy time has come - our time has come
I'm emotionally numb - emotionally numb
I'm headed for the stars, I'm leaving my house on Mars
No friends in my house on Mars
No foes in my house on Mars
I was born in my house on Mars
I will die in my house on Mars
