

At Our Expense

Against All Authority

We're holding banners - And they're holding guns Keeping our rebellion to a minimum It's so insane - It's at our expense As we watch them gain behind this barbed wire fence And the media distorts the truth You make decisions that affect us all Put us in a position that we don't belong And the media distorts the truth We never had a choice We never had a voice All of our resources have been spent And it's at our expense Now you're punching holes in the sky To probe what can be reached and suck it dry With plutonium powered rockets that fly And it's at our expense It's at our expense It's at our expense And it's all at our expense It's at our expense
