Over the Top

White Wizzard

On the horizon
In the killing fields
You have the fight to carry on.
Look to the starlight
See your destiny
Never giving up the will to be.

You're gonna make it
You've got the fire
Flames of your destiny burning with desire!
You've got the dreams
You're burning higher
On wings of steel, you soar to heights that will inspire!

[Chorus]:
Over the top
The magic in us all that will survive
The fuel that tries to keep the dream alive
Over the top
Over

Out in the cold night
And on the darkest day
You have to fight against the grey.
Look deep inside you
Find out what is real
Honesty and truth will be revealed.

You're gonna make it
You've got the fire
Flames of your destiny burning with desire!
You've got the dreams
You're burning higher
On wings of steel, you soar to heights that will inspire!

[Chorus]

[Guitar Solo]

Ooooooooohhhhhhhh!

On the horizon
Out in the the killing fields
You have the fight to carry on.
Look to the starlight
See your destiny
Never giving up the will to be.

You're gonna make it
You've got the fire
Flames of your destiny burning with desire!
You've got the dreams
You're burning higher
On wings of steel, you soar to heights that will inspire!

Over the top
The magic in us all that will survive
The few that try to keep the dream alive
Over the top
Over the top (over the top!)
