Closer

Susan Ashton

It's just me and you and the man in the moon shinin' down
A blanket of stars up above and a quilt on the ground
I've waited so long to get you all alone in the dark
I just want to hold you till I feel the beat of your heartI wanna get closer, closer
Closer than moonlight that your body's wrapped in tonight, yeah
Closer to heaven than I've ever been in my life
Before the night's over I wanna get closerMy two aching arms have been longing to hold you this way
These lips have been praying that I'd find the right words to say
I don't want to own you or try to control how you feel
I want you to need me, believe me this feeling is realI wanna get closer, closer
Closer than moonlight that your body's wrapped in tonight, yeah
Closer to heaven than I've ever been in my life
Before the night's over I wanna get closerCloser than moonlight that your body's wrapped in tonight, yeah
Closer to heaven than I've ever been in my life
Before the night's over I wanna get closer
Before the night's over I wanna get closer
