

# Ends of the Earth

## Hot Chip

You promised me the ends of the earth but I don't want that  
I just want you to feel the relief of a man  
They say that love is drunk but drugged on meth ?  
On and on it's you that pulls me back You promised me the ends of the earth but I don't want that  
I just want you to feel the relief of a man  
They say that love is drunk but drugged on meth ?  
On and on it's you that pulls me back Where I go, you tell me  
My voice is within me  
Where I go, you spell me  
What I start is complete I try to keep myself taught up with all that's good and bad  
Don't wanna fall behind the pack, it'll send me mad  
If you were ever this complete, you've lost yourself, you've lost yourself  
You need to reach beyond the stock that falls straight from the shelf  
You need to reach beyond the stock that leads straight to your well You promised me the ends of the earth but I  
don't want that  
I just want you to feel the relief of a man  
They say that love is drunk but drugged on meth ?  
On and on it's you that pulls me back You promised me the ends of the earth but I don't want that  
I just want you to feel the relief of a man  
They say that love is drunk but drugged on meth ?  
On and on it's you that pulls me back Where I go, you tell me  
My voice is within me  
Where I go, you spell me  
What I start is complete
