

# Threshold (feat. Melisa Whiskey)

## Redlight

No need to question our connection  
Let go of all the doubts in your mindWe've gotta keep moving in the same direction  
And whether good or bad we can make this rightIf you feel you're hurting  
    You should let me know  
    Let me know  
    We just keep on treading  
On these four blindsI've reached my threshold  
    And we can let go  
    Searching for that signal  
    So we can find loveDon't want to let us grow complacent  
Can't feel like we're living on borrowed timeSitting here our energy keeps on changing  
    We gotta fuse together until we galvaniseIf you feel you're hurting  
    You should let me know  
    Let me know  
    We just keep on treading  
On these fault linesI've reached my threshold  
    And we can let go  
    Searching for that signal  
    So we can find loveAnd I'll give you every part of me  
    If we stick together we'll be free  
    And we'll keep on  
    Just keep onI've reached my threshold  
    And we can let go  
    Searching for that signal  
    So we can find loveI've reached my threshold  
    And we can let go  
    Searching for that signal  
    So we can find love
