

Perfect Time

We Shot the Moon

You found a place between the lights
Of yesterday I could not hide
We can make it if we only try
We can make it And there you are in perfect time
You're standing still, your hands in mine
And I love you for who you are
And I love you just how you are You are, you are the only one for me
And you are, you are the only one for me
I tried for years to get this right
And I'm not about to lose this fight
To lose this fight The longest mile I'll walk with you
If your sky falls I'll pull you through
And I love you for who you are
And I love you, stay who you are You are, you are the only one for me
And you are, you are the only one for me
I tried for years to get this right
And I'm not about to lose this I don't have to write it down
I know that you'll be around
When the days are long the love goes on
And everything that has gone wrong is brought into the light You are, you are the only one for me
You are, you are the only one for me
I tried for years to get this right
And I'm not about to lose this fight
To lose this fight
