

# Going Strong

Anita Meyer

Well, there's a brand new century about to begin  
And the kids of the 90's are paving the path  
For the youth of America, free at last  
From the violence and destruction that destroyed our name  
Whenever there was trouble we took the blame  
But now our scene is alive  
With a new generation of American kids  
We work hard now lets enjoy the fruits of what we've done  
Tomorrow may never come  
The kids on the street will have their say now, because  
We've had enough of these negative comparisons  
It's a new breed of kids  
Brought together by a movement and a sense of tradition  
Only strong will survive  
And together our backs can never be broken  
'Cause now our scene's alive  
With a new generation of American kids  
We work hard now lets enjoy the fruits of what we've done  
Tomorrow may never come  
The kids on the street will have their say now, because  
You gotta live for today  
The kids on the street'll have their say and this is our way  
Lets show 'em the world what we've become  
Because I live for today  
Kids on the street'll have their say and this is our way  
Lets show them the world what we've become  
We work hard now lets enjoy the fruits of what we've done  
Tomorrow may never come  
The kids on the street will have their say now, because  
You gotta live for today  
The kids on the street'll have their say and this is our way  
Lets show them the world what we've become  
Because I live for today  
The kids on the street'll have their say and this is our way  
Well, well going strong
