

Better Way

Sounds Under Radio

Don't fall asleep now, the daylight has come
Just crowd the streets now... and look what I've become Shake your eyes, look to the right side of this
I'm not trying break -could you Hold back, all that you feel... it's a better way, a better way
Hold back, all that you said... there's a better way, a better way Cover me with your reason, stave off the decline
we'll change the seasons, faults will align Shake your eyes, look to the right side of this
I'm not trying break- could you Hold back, all that you feel... it's a better way, a better way
Hold back, all that you said... there's a better way, a better way falling softly... suffer today, you will suffer today
we'll fall in to pieces... we will suffer today, suffer today Just don't say... don't say Hold back, all that you feel...
it's a better way, a better way
Hold back, all that you said... there's a better way, a better way Just run away... from all that you feel
Just run away... from all that said
