

God Is the Gun

[Birdwu](#)

Can you feel the rude enigma falling all around

Breathing in disease and air without making a sound.

All we need to do. Forget the seasons that bring you down let's drink the evening away for we must remember
that for some God is the gun. Can you see the lonely neighbor harvesting the ground Sleeping while he's waiting
for the sun to go down.

All he needs to do Live all the days out only cuz he might surrender to the night.

He must remember that for some God is the gun.
