It Was You

fade

Wake up to the sunrise
wondering where I had been
Was it a dream or was it real I close my eyes
Anything to see you smile
Let me be the one to show you
a new beginning awaitsCause nothing lasts for good
So you may say to me
But I will make this last for you, so forever
embrace everything that you feel nowLike every star across the night
You will always guide my heart
I cant promise you the world
But I will give you everything that Ive got
It was you, it was you
You made me realize that it was youThinking about tomorrow
and everything that I can sense
Rain may fall instead of snow, but Ill carry on
I promise you that Ill be there
Let me be the one to show you
Im reaching out for you right nowLike every star across the night
You will always guide my heart
I cant promise you the world
But I will give you everything that Ive got
It was you, it was you
You have made me realize that it was you, yeahJust as the moon reflects the sun
You have revealed the good in me
I never knew what was inside
Until you gave the key to my heart
It was you, it was you
And from the memories of tears Ill be freeLike every star across the night
You will always guide my heart
I cant promise you the world
But I will give you everything that Ive got
It is you, cause it is you
You made me realize that it is you
It is you
