Golem

Terrestre

I know, I know, from the assembly line
I know, I know, the three laws of my
type
I was not built to lieI was not made to smile
I ask my positron self
why am I born apartevery night, every morning
there's no reason for my eyes to glow
every day
we work alone inside the big domeI know, I know, all data and functions
I don't care what I am
I know, I know, the power of the sun
I am the never manwhy do I dream of kites
I ask my kindred spiritwhatever to serve my master
anything to save my masterI know, I know, the same old daily grind
I know, I know, the passage of my time
