

# Faces

## 2 Unlimited

Look around you  
What do the faces tell you?  
Faces, joy and pain  
Faces, all around different faces I see  
Some are happy, some in misery  
They express joy and pain  
No two faces are the same  
People, people all over town  
Some of them are poor and others wear a crown  
I've seen a lot so many faces  
Joy and pain in different places  
Open your mind, set your soul free  
Figure it out, what will it be?  
Sympathize, understand  
Give love and peace to the other fellow man  
Faces, faces, joy and pain  
Look around you  
What do the faces tell you?  
Everywhere I go, different faces I see  
Faces, all around different faces I see  
Some are happy, some in misery  
They express joy and pain  
No two faces are the same  
Playing with your life, playing with your soul  
You all scream out, "I'm the one in control"  
Killing of the colors, silly stupid games  
You know who you are without no names  
Don't mess the world cause that's the sequel  
Open your mind cause we talking about the people  
In the world, all kind of traces  
Different races, different faces  
Different faces, everywhere
