The Dream Sequencer

Ayreon

"It is the 22nd century. I am the last of the Mars Colonists. The air
supply has almost run out on this desolate Mars colony, and the food
supplies from Earth have stopped arriving since the final war of 2084. I
am walking through the tunnel towards our recreation machine called the
Dream Sequencer. I hope it will sweeten my final days..."[Lana Lane (voice)](Dream sequencer system online)
Good morning colonist. You have selected the Universal Migrator program.
Please lie down in the energy tank and place the electrodes on your temples.
Think of your designation number and drink the fluid from the vessel at the left
terminal.(Program loaded, commencing U.M. preincarnation protocol)
Now focus on the music as I take you back to your chilhood.....and beyond.....
