Get Connected

Beatman and Rockin

Out, in the night, on my way back, in a taxi's backseat Out of the blue, you just wrote back, like it's hide and seek game So much for all this time to try and move on You like to keep me hanging on A word, a line is not enough this time We need to step it up Cause I don't wanna waste another night hanging to a call that keeps on fading Trying to hear your voice between the lines I can't take it anymore Let's get get get connected, Let's get get get connected Cause I don't wanna wait, I don't wanna waste another night Let's get connected Out on the street, in the rain, and my head is spinning Out of options, this attraction can't be left unspoken You got, you got, you got me aching I'm on the verge of breaking out Can't stand the scene, I'm staring at a screen Slave to a fucking blinking light Cause I don't wanna waste another night hanging to a call that keeps on fading Trying to hear your voice between the lines I can't take it anymore Let's get get get connected, Let's get get get connected Cause I don't wanna wait, I don't wanna waste another night Let's get connected Take us back to where we begun where the distance would be Wearing off 'til its nothing at all Won't be cutting off no more... Out on the street, in the rain, and my head is spinning Out of the blue, you just wrote back...
