I Do All My Dreamin' There

Luke Bryan

[Luke]

You know I got me and swat somewhere Come on There's a little place down the old road Nobody but me and the whole world knows I've been going there ever since I was a kid On my red dirt boot, and my blue texan Spend a lot long summer nights With the hood out in the satellites Ain't the kind of place that I ever shared But come on with me, and let me take you whereI done some barber sinking, Peanut butter sandwich and eat it Watching the world go by Where I've done some beer crackin' Crying, praying, laughin' Just talking to the man in the sky Baby, jump on in, there's a huckleberry land We can leave our curse and our cares Who knows what can happen When the summer's sweet jasmine in the air? I do all my dreamin' there! There's a big road on the other side Where I took my grand paws parking night And I carved their names with tears in my eyes When we join grandma, and the bar and bar Got them right here in the dashboard box Tip broke off and it won't come off But I'd better carve our names just fine If you just come along with me next timeI done some barber sinking, Peanut butter sandwich and eat it Watching the world go by Where I've done some beer crackin' Crying, praying, laughin' Just talking to the man in the sky Baby, jump on in, there's a huckleberry land We can leave our curse and our cares Who knows what can happen When the summer's sweet jasmine in the air? I do all my dreamin' there!Yeah I done some barber sinking, Peanut butter sandwich and eat it Watching the world go by

Where I've done some beer crackin' Crying, praying, laughin' Just talking to the man in the sky Baby, jump on in, there's a huckleberry land We can leave our curse and our cares Who knows what can happen When the summer's sweet jasmine in the air? I do all my dreamin' there!Right there, ha ha ha!
