

I Found You

Nicole Henry

Now that I found you, please don't go away
Don't leave me wondering if you gonna stay
I have risen, out from under this pain
Seems we've been given a chance to love again

Now that I found you don't you lose your way
Now That I Found You, Please don't run away

I can love you in my quiet way
I can hold you when your spirit fades
Yours is the kind of life I could breathe each day
Yours is the kind of heart I've looked for everywhere

Now that I found you don't you lose your way
Now that I found you please don't run away

Oh in the morning
I would love to speak your name
In the nighttime, see you again
Well I could be wrong,
but I think it could be great
Great! Great!

Now that I found you, please don't go away
Don't leave me wonderin' if you gonna stay
Love is seldom perfect, and it's given to change
I'd be glad if you'd take my hand, and try love once again

Now that I found you don't you lose your way
Now that I found you please don't run away
